### OFFENSIVE SCOUTING REPORT

Tennessee had a 9-7 record last season despite missing production from some of their most talented players. The Titans have two solid options at QB: veteran Matt Hasselbeck and the athletic and younger Jake Locker. Locker can scramble in or out of trouble depending on how talented you are on the sticks—make sure you can handle his style of gameplay. No matter who is under center, focus on giving the ball to HB Chris Johnson. He is an elusive player with top-end speed that most can't hang with. He should grab the defense's attention and make life easier for the whole offense. Thankfully the Titans will get back star WR Kenny Britt, who has the size and speed to challenge any CB on the outside. Joining Britt is rookie WR Kendall Wright, who has great quickness and should be used over the middle. This leaves Nate Washington, who excelled last year, to be a vertical threat for your offense—allow yourself to take a shot downfield once a half to keep the defense honest. The Titans have assembled some great offensive pieces and will be an under-the-radar but very good offense in *Madden NFL 13*.

### DEFENSIVE SCOUTING REPORT

Tennessee was unable to generate pressure on the QB from the edge last season. To fix this issue, they added lightning-fast rusher Kamerion Wimbley to go opposite DE Derrick Morgan. Unleash these players and you should get some solid pressure without giving up too much in coverage. Many gamers don't know about the talented MLB Colin McCarthy, who gives a boost to the already speedy corps. These guys can be utilized against the pass, so don't rush into your dime package. The secondary will benefit from CB Jason McCourty's big year, and he should be a lockdown player in *Madden NFL 13*. Look to user-control athletic safety Michael Griffin, as he can make up for many mistakes with his speed.
